SUMMARY

Senior Software Engineer with 11+ years of experience designing and building enterprise applications, backend platforms, workflow systems, and cloud-native solutions.

Experienced in PHP, Symfony, Laravel, React.js, MySQL, Redis, AWS, Docker, and distributed systems. Proven track record of delivering scalable software, improving platform performance, designing APIs, and solving complex business problems across SaaS, marketing technology, logistics, finance, and workflow automation domains.

Strong expertise in backend architecture, database design, system integration, performance optimization, and software engineering best practices.

EDUCATION

Dr. K. V. Subba Reddy Institute of Technology (JNTUA)

Bachelor of Technology

EXPERIENCE

Senior Software Engineer

Oct 2025 – Present

Cvent

Working on Splash, Cvent's event marketing and registration platform, building scalable backend services and modern web applications.

- Develop enterprise-grade backend services using Symfony and PHP.
- Build customer-facing features using React.js and modern frontend technologies.
- Design and maintain APIs and integrations supporting large-scale event workflows.
- Improve application performance, reliability, and scalability.
- Collaborate with engineering, product, and design teams to deliver business-critical features.
- Technologies: Symfony, PHP, React.js, MySQL, AWS, REST APIs

Associate Consultant

Jan 2022 – Sep 2025

GlobalLogic

Contributed to multiple enterprise products including Adobe Marketo Engage, Dynamic Chat, AdTech, and CRM integrations.

- Developed new features and integrations for Adobe Marketo Engage.
- Built Dynamic Chat Analytics Reports using React.js, TypeScript, and GraphQL.
- Integrated Salesforce and Microsoft Dynamics ecosystems.
- Contributed to AdTech solutions supporting Web, Mobile, and Connected TV (CTV) platforms.
- Led development of key features ensuring scalability and production reliability.
- Technologies: React.js, TypeScript, GraphQL, PHP, Laravel, MySQL, Redis, AWS

Technical Lead

Jun 2021 – Dec 2021

Pacific IT Consulting Pvt Ltd

- Led architecture and implementation of logistics and CRM platforms.
- Designed database schemas and backend services.
- Integrated external APIs and mobile application ecosystems.
- Coordinated requirements gathering and technical solution design.
- Technologies: PHP, MySQL, REST APIs, JavaScript

Senior Project Lead → Web Developer

May 2014 – Jun 2021

Suvision Holdings Pvt Ltd

- Led development of multiple enterprise web applications and APIs.
- Managed a team of developers and conducted code reviews.
- Designed scalable backend systems and database architectures.
- Improved performance, code quality, and deployment processes.
- Mentored junior engineers and established engineering best practices.
- Technologies: PHP, MySQL, JavaScript, jQuery, HTML, CSS

PROJECTS

Splash Platform (Cvent) | Event marketing and registration platform helping organizations create, manage, and promote events at scale.

- Tech Stack: Symfony • React.js • MySQL • AWS

Pricing Approval Engine | Enterprise workflow platform supporting business validations, approval flows, pricing rules, and audit trails.

- Tech Stack: PHP • MySQL • Workflow Automation

URL Shortener Platform | Designed a scalable URL shortening platform featuring Redis caching, analytics, click tracking, and rate limiting.

- Tech Stack: Laravel • Redis • MySQL • Docker

Loadout Settlement Platform | Settlement workflow platform ensuring financial accuracy, transactional integrity, and operational efficiency.

- Tech Stack: PHP • MySQL • Business Workflow Systems

TECHNICAL SKILLS

PHP

JavaScript

TypeScript

Symfony

Laravel

CakePHP

React.js

MySQL

Redis

MongoDB

AWS

Docker

CI/CD

Git

REST APIs

Distributed Systems

Microservices

System Design

GraphQL

Jira

GitHub

Bitbucket
